ACO Water Management: Urban + Landscape

ACO HexDrain® Pro

- ✓ Provides effective drainage for a wide range of surface areas
- ✓ Suitable for light to medium duty traffic applications
- ✓ HexTechnology™: Strong and robust channel design
- ✓ Heelguard™ grating suitable for pedestrian traffic
- ✓ Light weight for easy installation
- ✓ Outlet available by gullies, sumps or channel knockout
- ✓ 100% recyclable
- ✓ ACO Drainlock™ grating – this bar-less locking device allows for quick and simple installation of gratings
- ✓ CE marked and fully certified to Load Class C 250 BS EN 1433:2002

ACO HexDrain® Pro

High quality, high strength general purpose channel drainage system

Manufactured using recycled polypropylene, ACO HexDrain® Pro is a high quality channel drainage system ideal for light to medium duty traffic applications.

The high strength 1m black plastic channel has integral edge rails for improved strength and comes complete with Heelguard™ black gratings fitted with ACO's Drainlock™ barless locking system.

The system benefits from HexTechnology™, an advanced process of plastic design and manufacturing technology. The hexagonal structure of the channel provides exceptional strength and rigidity whilst keeping weight to a minimum.

Typical applications

- ▶ Domestic landscaping
- ▶ Public landscaping
- ▶ Car parks

ACO HexDrain® Pro

System Overview

C 250 Public parking areas, service stations (cars) and slow-moving light commercial vehicles

Features

ACO HEXDRAIN PRO GRATING AND ACCESSORIES

This system comes complete with 8mm slotted Heelguard™ black composite gratings.

Vertical outlet connector

Universal endcap

Sump unit with silt bucket

Foul air-trap

ACO HexDrain® Pro channel assembly

Product code	Description	Length (mm)	Width (mm)	Depth (mm)	Invert mm	Weight (kg)
11025	Channel with black composite Heelguard™ grating 1m	1000	138	150	125	3.7

ACO HexDrain® Pro accessories

Product code	Description	Length (mm)	Width (mm)	Depth (mm)	Invert mm	Weight (kg)
11086	Universal endcap	11	138	150	-	0.1
11285	Ø110mm vertical outlet connector	-	Ø110	60	-	0.1
11286	Ø160mm vertical outlet connector	-	Ø160	80	-	0.2
11191	Ø110mm roddable foul air-trap	240	Ø110	400	-	1.2
11192	Ø160mm roddable foul air-trap	340	Ø160	415	-	1.4
11385	Black plastic sump assembly c/w silt bucket*	-	Ø160	510	-	3.0

*Sump assembly consists of a Ø160mm vertical outlet connector, silt bucket and sump body. Sump unit: Ø110mm outlet (upper) invert height to F.G.L = 362mm. Ø110mm or Ø160mm outlet (lower) invert height to F.G.L = 632mm.

ACO HEXDRAIN PRO INSTALLATION

Dig trench, allowing for width of channel plus 150mm each side for concrete haunch and depth of channel plus 150mm for concrete bedding. Allow also for 150mm concrete around and beneath sump unit. Mark finishing height with fixed line 3mm below final surface. Lay 150mm (min) bed of concrete.

Knock out pre-formed outlet from the inside (marked with hammer symbol) and trim edges with a sharp knife. Fit outlet connector and sump. Position sump and outlet channel on concrete bed, fit PVC-U union/trap to drainage pipework.

Lay channels starting from outlet/sump, ensuring joints connect by lowering units horizontally. Fit endcaps to end channels. For fully watertight joints, use a suitable sealant (contact ACO for further advice).

With gratings fitted, haunch around channels/sumps with concrete. Final surface to be 3mm above grating. Bricks/paviours should be laid in mortar for lateral stability.
